INTRODUCING CRYPTO SOLUTIONS FOR BROKERS

Our in-house software developers and programmers have a minimum of three years of experience managed directly by the team leader.

MEET YOUR PROJECT MANAGER AND TEAM LEADER

1 BRIAN PLATT, CTO

PROJECT MANAGER

Brian joined FDC in May 2016. Brian has over ten years' experience in the FX industry, managing complex technology, and business operations. His expertise includes advanced technical knowledge of databases, programming, product development lifecycles, and a clear understanding of business needs. Brian's passion is combining this business and technical knowhow to assure the best products, client satisfaction, and optimization of human resources.

Prior to joining the Company, Brian was the head of technology at Fortress Capital Investments, UAE, from June 2014 to January 2016, where he was

instrumental in starting a forex broker from the ground up, introducing the trading platform, connecting liquidity, add on services such as money management PAMM systems, and a compliance reporting.

From May 2011- February 2014, Brian served as the Director of Risk Management and Operations Research at Boston Technologies. His significant accomplishments include developing advanced procedures to eliminate trade risk, streamlining accounting operations, revamping client reporting, integrating new revenue streams, and providing comprehensive analytics.

Before joining Boston Technologies, Brian managed the Operations Research department at CMS Forex from March 2006 through May 2011. In this role, he coordinated all business intelligence

efforts, identified and automated manual operations, and facilitated new business initiatives. Brian organized the operational elements of the sale of CMS Forex to Gain Capital and subsequently revamped the company to utilize existing resources as a profitable self-sufficient IB business. Brian holds a degree in Information Systems from Yeshiva University. He has computer science training from New York University and Oracle DBA training from Farleigh Dickenson University.

AVOID COMPLEXITY AND TRANSFORM YOUR BUSINESS BY USING OUR CUSTOM DEVELOPMENT EXPERTISE

2 ANTON MEDVEDEV

TEAM LEADER

Anton has over ten years of software development and managing software development projects. He has expertise in both back-end and front-end development using C#, java, scala, c++, delphi, php, NET, Javascript, angularjs, and much more. Anton's specific focus has been in the forex industry, where he led numerous projects, including the development of low latency, high-performance trading systems, and big data analytics software.

Anton joined FDC in March 2016 as the team lead and manager of a development team in Chelyabinsk, Russia. He has managed software development projects and leads the technical support team at FDC. Along with his talented team of developers, Anton has built multi-language back-office reporting portal site trading platforms, and CRM systems.

Anton is leading the FDC team on custom development tasks for various forex and crypto brokers.

Anton has expertise in the development of CRM and ERP software for large multinational companies. Anton has developed full-stack applications for forex businesses, including but not limited to CRM, on-boarding, KYC, accounting, notification, back-office, and webtrader. Anton received his Masters in System Design from South Ural State University in 2005.
